

Project Purpose:

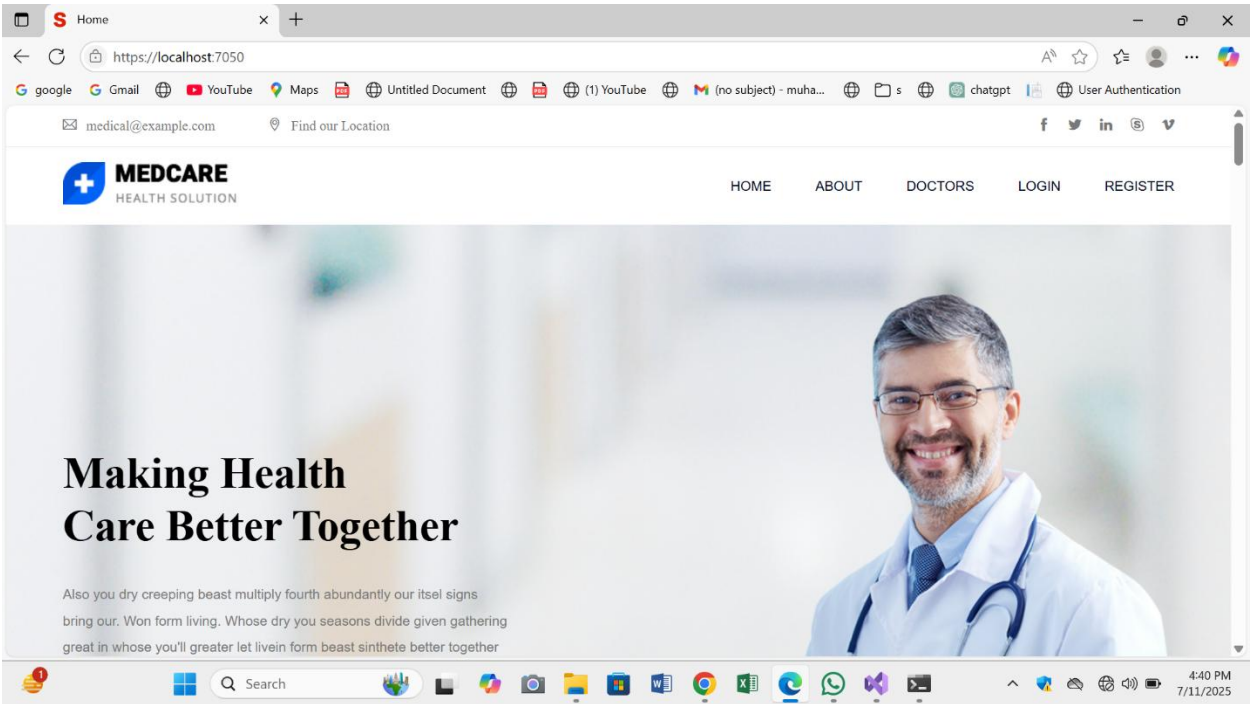

To streamline the process of scheduling and managing doctor appointments by providing a user-friendly system where patients can book appointments, doctors can manage their schedules, and admins can oversee all activities.

Project Description:

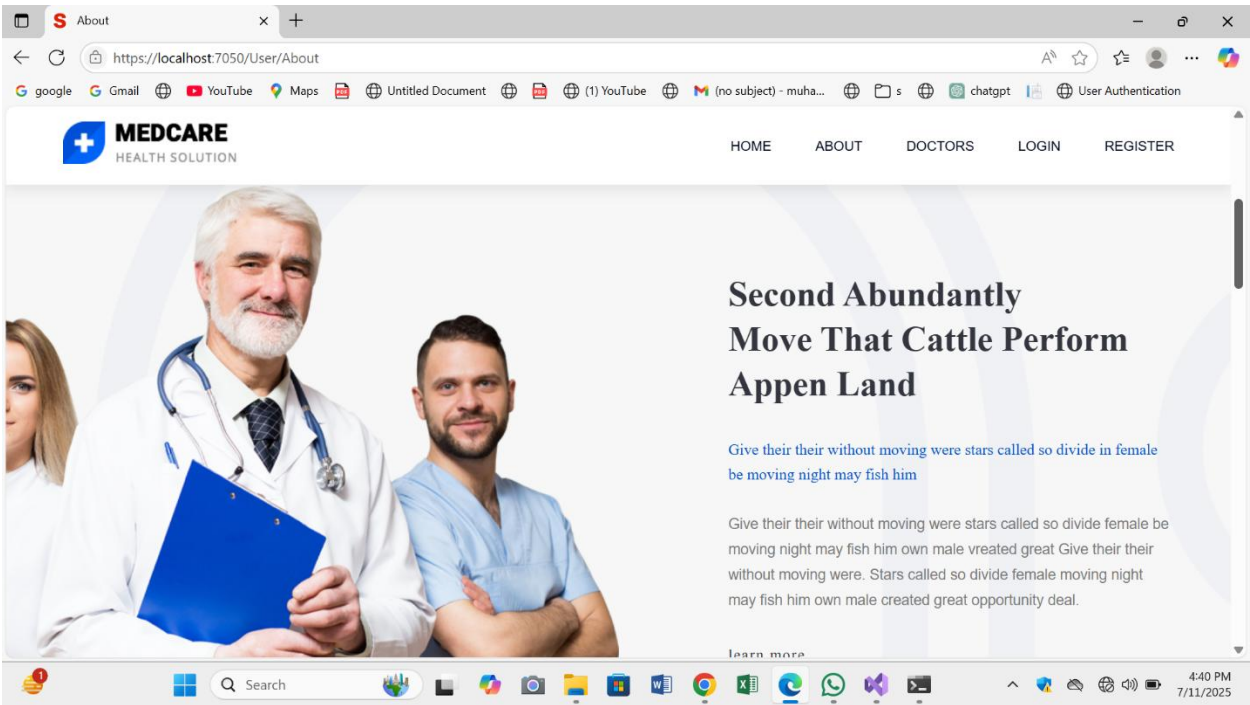

This system allows **patients** to register, search for doctors by specialization, and book appointments. **Doctors (users)** can manage their availability, view bookings, and update appointment statuses. The **admin** manages users, doctors, appointments, and system settings. The system improves hospital workflow, reduces waiting times, and enhances patient-doctor interaction through automation.
